- Website & Web Systems development and maintenance.
- Custom Networking installation and support.
- Application/server/network security and maintenance.
- Custom Database solutions.
- Custom Graphic design.
- Project Management and support.
- Administrative and technical support.

Business Solutions

Custom Software Solutions Developed

Most of our solutions are developed to our client's specification, for purpose-specific requirements.

Web Development

We excel at developing custom web applications. We analyse the business process and develop systems right from planning/designing, developing, testing and implementation. Our portfolio ranges from successful portals, e-Commerce websites, CMS and Web applications and more.

Networking, Email and Internet Gateway Systems.

Our custom (client-specific) networking, LAN and WAN communication systems and business solutions are secure world class solutions that enable our clients to compete and stay ahead in today's global scenario.

On-Site Software Facilities Management.

Always sensitive to our client's businesses and changing requirements, we are one of few Solutions Providers to offer clients on-going software facilities maintenance options, 24x7x365 system administration and facilities management; enabling them to keep their IT set-up and solutions running with the minimum downtime.

Being one of the foremost IT solutions and Support Companies in Goa, we even offer our clients software facilities maintenance for software and solutions not set-up by us.

We really do understand our client's needs... and provide long-term working solutions!

Offshore Software Development.

We have provided custom software development facilities and solutions to companies in India, the U.K., Europe and the US. For offshore Software development. We offer teams of skilled resources along with the necessary infrastructure, which results in sizeable cost reduction and the added benefit of using the time difference globally to the western client's advantage.

Non-commercial activities

In 2005, we successfully completed a World Bank funded R&D Project on the implementation of state-of-the-art Internet Communication Technologies to rural schools in Goa. For more information visit: <http://www.opspl.com/infodev>.

We are also actively associated with professional societies like the Computer Society of India - Goa Chapter, (<http://www.csi-go.org>) and the Goa Linux users group, where our professionals have been providing technological impetus for the last 12+ years.

Our Clients

In the last twenty years of operations, we are currently providing/have provided Customized Corporate, Information Technology, business productivity solutions and off-site development facilities, to some of the best-known organizations in the local (and international) corporate arena.

Project Summaries
